SUMMARY

B.Tech Computer Science student passionate about Artificial Intelligence, backend systems, computer vision, and algorithmic problem solving. Experienced in developing conversational AI systems, LLM-powered chatbots, and optimization-focused applications using Python and C++. Interested in building scalable AI-driven products and real-world intelligent systems.

PROJECTS

NeuroVision Face Recognition System

Computer Vision Project 2025

- Developed an AI-powered real-time face recognition system using computer vision techniques.
- Implemented face detection, encoding, and identity matching pipelines.
- Built preprocessing workflows for lighting correction and facial alignment.
- Integrated webcam-based live face recognition functionality.
- Tech Stack:** Python, OpenCV, NumPy, Deep Learning

Saarthi AI Chatbot

Generative AI Project 2026

- Developed a conversational AI assistant using Google Gemini API.
- Designed multi-turn conversational workflows for contextual query handling.
- Implemented prompt engineering and semantic query understanding.
- Built scalable backend architecture for educational AI assistance.
- Tech Stack:** Python, Gemini API, NLP, Generative AI

JIIT College Chatbot

AI Assistant Project 2026

- Developed an AI chatbot for student academic and campus assistance.
- Implemented locally hosted LLM inference using Ollama.
- Designed context-aware response generation for campus-related queries.
- Built modular retrieval workflows for document-based question answering.
- Tech Stack:** Python, Ollama, LLMs, NLP

Chess Engine in C++

Personal Project 2025

- Built a bitboard-based chess engine with AI move generation.
- Implemented Minimax with Alpha-Beta pruning for decision optimization.
- Developed chess mechanics including castling, promotion, and en passant.
- Used piece-square tables and evaluation heuristics for board scoring.
- Tech Stack:** C++, Bitboards, Minimax, Game AI

EDUCATION

B.Tech in Computer Science Engineering

Jaypee Institute of Information Technology, Noida 2023 – Present

CGPA: 7.7 in 5th semester

Senior Secondary Education

Apeejay School, Faridabad 2009 – 2023

ACHIEVEMENTS

- Built AI projects involving NLP, Generative AI, Computer Vision, and Game AI.
- Developed conversational AI systems using Gemini API and Ollama-hosted LLMs.
- Finalist-level hackathon experience with AI chatbot development.

SKILLS

Languages

C++, Python

Core CS

Data Structures & Algorithms
Object-Oriented Programming
Operating Systems
Computer Networks
DBMS

AI / ML

Natural Language Processing
Generative AI
OpenCV
Conversational AI
Prompt Engineering
LLMs

Libraries & Tools

NumPy
Pandas
Git
Linux
Ollama
Gemini API

Domains

Artificial Intelligence
Computer Vision
Backend Development
Conversational Systems
Game AI
